

1674.  
*Apollo Anglicanus,*

THE

ENGLISH APOLLO:

Assisting

All Persons in the right Understanding

of this Years Revolution, as also of  
things past, present, and to come.

With necessary Tables plain and useful.

A twofold Kalendar, viz. *Julian* or *English*,

*Gregorian* or *Foreign* Computations, more plain and  
full than any other; with the Sun and Moons

Risings and Settings daily observed,  
with Latitude.

Being the second after Bissextile or Leap-Year.

With a useful Continuation of

ÆTA BRITANNORUM,

From 1660 to this present Year.

By RICHARD SAUNDERS

*Student in Astrology and Physick.*

*Astra regunt corpus, mens libera sidera vincit,  
Est Deus in caelis, Hunc cole, tutus eris.*

*Cum Privilegio.*

LONDON, Printed by Andrew Clark for  
the Company of Stationers. 1674.

A Table shewing how many years Purchase a Lease or Annuity, to endure for any Term of years under 33. is worth presently at Interest upon Interest, at six in the hundred: and shewing plainly how to discount any Lease in Being, and the true value of the Reversion after any number of Years.

The use and explanation of this Table.			
Years of a Lease.	Years.	Months.	dec. par.
1	0	11	0
2	1	9	9
3	2	8	1
4	3	5	9
5	4	2	5
6	4	11	0
7	5	7	0
8	6	2	5
9	6	9	6
10	7	4	3
11	7	10	7
12	8	4	6
13	8	10	3
14	9	3	6
15	9	8	5
16	10	1	7

The first Column towards the left hand, sheweth the yeares of a Lease or Annuity, and right against each Year, is the Years Months and Decimal parts of a Months purchase, that such a Lease or Annuity is worth.

*Example.*

Suppose a Lease or Annuity to continue ten Yeares, and you would know how many years purchase it is worth in present money, look in the Table for ten yeares of a Lease to the left hand, and against the same you shall find 7,4,3. which sheweth such a Lease to be worth seven yeares four months, and three tenth Parts of a Months purchase.

Again, are you to take or

buy the Reversion of any Lease or Annuity, work thus, Suppose the Lease to be thirty yeares in all; you find in the second Table, and right hand against thirty, 13 yeares 9. months, and two tenth Parts of a months purchase; this it were worth, were it in present possession. But suppose there be a Lease of five yeares (more or less) before your Commence; look in the Table against the five Yeares, and there you find four Yeares, two Months, five tenth parts, halfe a Months purchase; take this out of the sum against thirty, which is 13,9,2. 4,2,5. The remainder is 9. yeares six moneths, seven tenth parts of a month; and so much is the Reversion after five yeares worth, the remainder of thirty yeares. This is usefull and very easie.

# Table of the Kings and Queens of England since the Conquest.

Kings and Queens names	Born Anno	Began to reign	Reigned Since their reigns ended.		Buried at
			Y.	M.	
William 1	1023	1066, Oct. 14	20	11	587, Sept. 9 Caen Norm.
William 2	1057	1087, Sep. 9	12	11	574, Aug. 2 Winchester
Henry 1	1068	1100, Aug. 2	35	4	539, Dec. 1 Reding
Stephen	1105	1135, Dec. 1	18	1	520, Oct. 25 Feversham

## The Saxon Line restor'd.

Henry 2	1132	1154, Oct. 25	35	9	485, July 6 Fountever.
Richard 1	1155	1189, July 6	34	9	475, April 6 Fountever.
John	1165	1199, April 6	17	6	458, Oct. 19 Worcester
Henry 3	1207	1216, Oct. 19	56	1	402, Nov. 16 Westminster
Edward 1	1239	1272, No. 16	34	8	367, July 7 Westminster
Edward 2	1283	1307, July 7	19	6	348, Jan. 25 Gloucester

Richard 2	1366	1377, Jun. 21	22	3	275, Sept. 29 Westminster

## The Line of Lancaster.

Henry 4	1367	1399, Sep. 29	13	6	161, Mar. 20 Canterbury
Henry 5	1384	1412, Mar. 20	9	5	252, Aug. 31 Westminster
Henry 6	1421	1422, Aug. 3	1	38	62, Mar. 4 Winfor

## The Line of York.

Edward 4	1442	1460, Mar. 4	22	1	191, April 9 Winchester
Edward 5	1471	1483, April. 9	0	2	191, June 18 Not known
Richard 3	1448	1483, Jun. 18	2	2	189, Aug. 22 Leist. (where)

## The Families United.

Henry 7	1455	1485, Au. 22	23	8	165, April 21 Westminster
Henry 8	1491	1508, Apr. 22	37	10	123, Jan. 28 Winfor
Edward 6	1537	1547, Jan. 28	6	5	121, July 6 Westminster
Q. Mary	1518	1553, July 6	5	4	116, Nov. 17 Westminster
Elizabeth.	1533	1558, No. 17	44	4	72, March 24 Westminster

## The Union of the two Kingdoms.

James	1566	1602, Ma. 24	22	0	49, March 27 Westminster
Charles 1	1600	1625, Ma. 27	23	11	26, Janu. 30 Winfor
Charles 2	1630	1648, Jan. 30	whom God grant long to Reign.		

The World must now confess, that Monarchs are  
Of him that rules above the chiefest care.

He with great CHARLES doth gently Peace restore.

Heaven could not give us, nor we covet more.

Hence Anti-monarchists, from you there springs

Slavery; but Freedom is from Heaven and Kings.

Then let all loyal hearts with us conclude,

May Caesar live, and Rebels be subdu'd.

Forewarn'd, forearm'd, the Terms approach you see;  
No Musick's sweet, like Angels Harmony.

Hilary-Term begins Jan. 23; and ends Feb. 12.

Return or days.	Effoin	Exception days.	Returna vium.	Bre-	Days of Ap- pearance.
Octob. Hil. Jan. 20	January	21	January	22	January 23
Quin. Hil. Jan. 27	January	28	January	29	January 30
Craft. Purif. Feb. 3	February	4	February	5	February 6
Oct Purif. Feb. 9	February	10	February	11	February 12

Easter-Term begins May 6, and ends June 5.

Quin. Pasc. May 4	May	5	May	6	May 7
Tres. Pasc. May 11	May	12	May	13	May 14
Mens. Pasc. May 18	May	19	May	20	May 21
Quin. Pas. May 25	May	26	May	27	May 28

Craft. Mar. Nov. 12	November	13	November	14	November 15
Octob. Mar. Nov. 18	November	19	November	20	November 21
Quin. Mar. Nov. 25	November	26	November	27	November 28

Note, The Exchequer opens eight days before any Term begins, except Trinity-Term, before which it opens only four days.

Note, That the first and last days of every Term, are the first and last days of Appearance.

*Directions for the subsequent Diary, or Almanack.*

1. In the first column to the left hand, on the left hand page, you have the Numeral figures of the days of the Month.
2. In the second column you have the week days, and Dominical Letter.
3. You have all the principal and observable Saints days and others; the places of the Planets, and the Moon most nights and what fixed Stars she is with, is observed; by which the Asterisms and Constellations are easily known to an ingenious eye and understanding.
4. The Moons place in the Zodiack every day at noon.
5. The age of the Moon, by which the Tides are known.
6. The rising and setting of the Moon, every day in the year.
7. The general state of the weather, with much care performed by the Author.
8. In the 8. column, the first on the right hand, you have the English account. In the 9. the Foreign. In the 10. the Roman week days, and Sunday Letter.
11. The perfect Roman Kalendar and Saints days.
- 12, 13, 14, the utmost to the right hand, you have the daily rising and setting of the Sun, with the Aspects.

*A Table to find when the Moon will be full South every day this year, whereby the time of Tides is exactly known.*

*M.A.H.b.f.* First find her age in the 5. column of the Almanack, which is exactly every day noted; which age seek out in one of the two columns of this Table to the left hand, against which in the third and fourth columns is the hour and minutes which shew the time of the Moons being South.

As for example, the 16. day of *March* the Moon is 19 days old, which being found in the 2 column of this Table against 4, to the right hand, it points to 3 h. 12 m. at which time the Moon is South the said 16. day of *March* 1674. *Et sic de ceteris.*

Here note, that all the increase she cometh to the South in the evening following the Sun; but in the decrease, in the morning going before the Sun.

By any Sun-dial you may know the hour of night by adding to the time of the Moon being South after, or subtracting before,

To find the time of High water in most Coasts of England.

First, as you before were taught, find at what time the Moon will be South, for then you may truly conclude it High-water at *Southampton*, *Quinborough*, and *Portsmouth*, for there the South and North Moons make a High-water. But when you desire the time of Full Sea in any of the following Coasts in the ensuing Table, find the name of the place, and see how many hours and minutes be annexed thereunto in the Column under *H.M.* which added to the time of the Moons coming to South, gives you the time of High-water for the place required.

A Tide-Table, with the Names of the Havens.

<i>Rochester, Maldon, Aberdeen,</i>	0	45
<i>Gravesend, Romney, Ramkins,</i>	1	30
<i>London, Tinnmouth, Harilepool,</i>	3	0
<i>Friith, Leith, Dunbar, Narbon,</i>	4	30
<i>Newcastle, Falmouth, Humber,</i>	5	15
<i>Lyn, Antwerp, Plimouth, Hull,</i>	6	0
<i>Bristol, Lanion, Foulness,</i>	6	45
<i>Milford, Bridgwater, North-coast,</i>	7	30
<i>Portland, Peterport, Hartflew,</i>	8	15
<i>Dover, Yarmouth, Harwich, Dublin,</i>	10	30
<i>Callice, Rie, Winchelsey, Calshot.</i>	11	15

Example.

The 16. of March this year, it is required to know the time of Full Sea at *Newcastle*: by the Kalendar over against the 16. of March, in the fifth Column, I find the Moon 19 days old, and by the foregoing Southing Table, I find the Moon South at 3 hours 12 minutes in the morning; then in the preceding Table, against *Newcastle* I find 5 hours 15 minutes, which added to 3 hours 12 minutes, the aggregate is 8 hours 27 minutes, wherefore I conclude it High-water there at 8 hours 27 minutes in the morning: so of any other.

Take notice that the Tide floweth one point of the Compass more at the Spring-Tide (which is the New and Full Moons) than at the Neap-Tides (the first and second Quarters) As also the Latitude of the Moon and Winds may alter it an hour sooner or later; let it be their providence who depend upon the Tides to make timely provision.

*The Tides like timorous Humours never rest,  
Still constant in inconstancy at best.*

*A true Chronology of memorable things to this year 1674*

<b>B</b> Rute entered this Island of Great Britain	2800

# NOVEMBER, 1674.

*Saturn* setteth between midnight and morning.  
*Jupiter* at the end of the month, recovers combustion.  
*Mars* warcheth all night, he riseth in the beginning of the night, and sets towards morning.  
*Venus* the evening star, shines illustriously, and by a Tube may be seen in the day time forked.  
*Mercury* is Combuſt.

# SAUNDERS,

1674.

## *of Eclipses this present Year 1674.*

**T**Here will be *Five Eclipses* this year, *three* of the *Sun*, and *two* of the *Moon*. Those of the *Sun* will be all in the *Night*, by reason of which, rendred inconspicuous to us, yet for the benefit of Travellers, and the verity of *Astronomical Grounds*, we will take some notice thereof.

The *First* of the *Sun* is the 10th of *January* at 9 at *Night*, and will be seen the *Sun* rising to them, which Navigate the *Occidental Ocean*, between the *Cape* of *Good Hope*, and *California*, and to the more Northward thereof the *Sun* will appear wholly obscured.

The *Second* of the *Sun* will be the 23 of *July*, about half an hour after 2 in the morning, and will in some part be Eclipsed at his rising to them which Sail the *Eastern Ocean*, near the *Island* of *St. Brandini*, and will appear wholly Eclipsed to them which Navigate between the *Promontory* of the *Cape* of *Good-Hope*, and *New-Holland*, and will set wholly Eclipsed in *Terra Australi incognita*.

The *Third Eclipse* of the *Sun* falls on the 17th day of *December*, half an hour after 5 in the morning, before the *Sun* ariseth to us; this will be but a small *Eclipse*, and chiefly visible to them that Navigate the *great Sea*, towards the *Magellanique Straights*, and the *South Pole*, these *Eclipses* being not visible to us, according to *Cardane* — *Nihil nocent in Illis regionibus ubi non videntur*, concern us not, therefore I forbear further mention.

The first *Eclipse* visible is of the *Moon*, and will be on the 12 day of *January*, half an hour after 5 in the morning, the *Moon* then in the *West*.

The whole continuance will be above 3 Houres, almost her whole Body will be dark.

The Beginning will be before ————— 4 in the  
Middle of the *Eclipse* half an hour after — 5 Morn-  
End almost half an hour after ————— 7 ing.

The beginning will appear, the *Moon* setting to them which shall be in the *Tartarian Ocean*, in *Pontus Euxinus*, in the Kingdom of *Caſan*, in *Natolia*, the bottome of the *Mediterranean Sea*, the Mouth of *Nilus*, *Cyprus*, *Egypt*, and *Nubia*, also, those who Navigate the *Pacificque Seas*, the more North-parts of *America*, and the more Occidental parts, shall at the same time see the *Moon* rise *Eclipsed*: In the end of the *Eclipse* the *Moon* shall set to them who inhabit *Lapland*, *Finland*, *Nova Zembla*, the *Baltique Sea*, *Denmark*, *Gotland*, the Kingdom of *Fesse*, *Gambia*, and *Morocho*.

They shall see it in their Meridian who are in *Florida*, *Nova Francia*, *Percu*, and the *Magellanique Seas*.

This *Eclipse* falls in the third degree of *Leo*, with a fixed Star of the nature of *Mars* and the *Sun* of the 4th Magnitude in the 7th House of Heaven, which Indicates some notable Exploit shortly to be put in practise, in surprising some eminent Town, Place, or Person of great Command, the *Moon* suffering this *Eclipse* in the 7th. House, and the seventh bearing signification of the Low-Countrys; afflicted likewise by *Saturn*, great probability of their worse and sad condition.

All the *Planets* have dignities and bear rule in this *Eclipse*, but onely the *Sun* and *Venus*, who are very weak, which denotes Multiplicity of Actions in most parts of the World; and the endeavors of some will be to preserve themselves, of others to prevent future stormes, which, through Inadvertency, they have expos'd themselves unto, of others to swallow up all, and of others to ballance Swelling Prevailing Powers. The next *Eclipse* hath signification to the same effect, as also

## A Prognostication

the Quarterly ingresses: But I must let my Reader know, I shall not presume herefrom to predict the *State* or *Fate* of *Kingdoms*, for (indeed) the Celestial Bodies of the Stars have great influence upon the earthly Bodies, powerfully to incline, but not forcibly to necessitate them in their Operations, so that from their powerful disposing, there may be made some Conjectural *Paadictions*, but not farther, without the especial Divine Assistance (as to *Daniel*) of Him who hath the hearts of Kings in his hand, and raiseth and depresseth Scepters as he pleaseth, and at his pleasure humbleth the *proud*, and raiseth the *humble*; Therefore let us in Obedience with humble patience, rather wait his will, than arrogantly pry into those things so far out of our reach, *Nam Quod supra nos Nihil ad Nos*; Let us keep within our own Spheare of Activity, lest by staring against the *Sun*, we lose the sight of our selves.

The *Effects* of this *Eclipse* operate chiefly in *March* and *April* next, and *Jupiter* being principally strong, and posited in the cuspe of the 10th House Angular, *Generaliter rebus Incrementa confert*, promisseth a good, wholesome, profitable Spring, and healthful; And, as to general Negotiations amongst Men, *Studium Justiciae* adauget, *Honorque & merces, digna & lucrosa subditis a regibus, Quibus ipsis utiliter inservient, defertur*, promotes Justice, Peace, and Tranquility, makes Subjects Obedient, and Princes Noble in rewarding their Merits; *Saturn* and *Mercury* being next in Dignities, threaten Sickneses, Windy and bad weathers, and Treacherous grudgings and repining at good Mens Actions, but the prevalency of *Jupiter* will prevent their *Malignancy*,

The second *Eclipse* visible of the *Moon*, is on Tuesday the 7 of *July*, 3 quarters of an hour after 8 at Night, a very great *Eclipse* for the *Moon*, will be *Totally* Darkened for some time.

The whole *Duration* of the *Eclipse* will be 3 *Houres* 49 *Min.*

# SAUNDERS, 1674.

The Continuance in totall Darknes will be 1 Hour, 2 Minutes.

The Beginning of the Eclipse will be at	--6 Hor.	51	Noon.
The Beginning of Total Darknes at	---8---	29	
The Middle of the Eclipse at	-----8---	45	
The Beginning of her recovery of light at	9---	31	
The End of the Eclipse at	-----10---	40	

The Moon will be Eclipsed to aboue an Hour before her rising, and will begin to be totally dark half an hour after her rising.

This Eclipse falls in the 26 Degree of *Virgo*, near the Dragons Head, and near a Star of the nature of *Mars* and *Venus* in the Left horne of the Goate.

In the beginning of the Eclipse the Moon is setting in the Kingdom of *Tanguth* and *Japan*.

She is at that time arising in *Lithuania*, *Germania*, *Moscovia*, *Polonia*, *Barbaria* and *Guiny*, and in *Majorca* and *Minorca*.

In the end of the Eclipse she sets to the Indians *Intra Gangem*, and to the Inhabitants in *Sumatra*, *Tartaria* and *Persia*.

At the same time she riseth to the *Camerician* Islands, in *Guinea* and the Kingdome of *Chile*.

This Eclipse falls in the 25th degree of *Capricorne*, the Sun then in *Cancer*, a Tropical Sign, but very weak, all the other Planets are more or less dignified, but the two Malevolents *Saturn* and *Mars* are most strong, both which have most power in the Gubernation of this Eclipse, being in Conjunction at the same time, in the second House of Heaven in square to the Moon, in the House of *Mars*, a Cardinal, and Equinoctial Sign, the first of the fiery Trygon, the Sun being near *Caudadraconis* almost in parallel square to *Saturn* and *Mars*.

Oh! Infandum! renovant Dolorem: Infinite Calamities to those places under *Cancer* and *Capricorne*; to some here is signified Mischiefs perfected, to others Mischiefs devising, but if *Holland* and *Amsterdam* have any subsistence at this time, let them look to receive their share of superlative

## A Prognostication:

superlative sorrow; but (blessed be God) London comes not the least under these Malignancies.

The effects of this Eclipse chiefly operate in August and September following; and certainly many new Mischiefs will grow from hurtful Policies, many years since laid by imprudent Statesmen, so that the Lamb shall spoil the Lion of his prey, and the Crabb reduc'd to its pristine condition by a Retrograde Motion.

This Eclipse falls in the 12th House of Heaven, the Sun in the 6th (some other Grounds consider'd) intimates some secret Plots, Stratagems, or Contrivances are hatching and preparing, which are likely to be opportunely discovered and prevented; Imprisonment and Restraint of Liberty is threaten'd to refractory persons disobedient to Magistrates, *ed Quicumque vult, let whose will write further of these effects, which are like to be wonderful, the effects of the last Comet still operating, for between this and 1680. Cardane hath long since observed, Ut inspicit Mutatio Legum, cui nunquam fuit similis, & consurget Nova Lex, & cum his alia multa; In some places there will begin an alteration of Lawes, the like whereof never was, such strange and preposterous Mutations and Changes, which ought to admonish all Europe to beware of these Calamities threaten'd, almost impending over many of their heads, and without repentance prevent, may attend them in a few succeeding yeares, Amor Laesus fit fura, the kind compliances of some may be rewarded with open and unexpected Hostility; Triste aliquid & formidabile expectandum cum aliquorum Cæde & interitu, dejectione summorum Nobilium, & exaltatione egentium; the Accomplishment of Self-Interest (rather than honest Performances) is to be expected from some prevailing powers.*

The Conjunction of Saturn and Mars in the second is to this purpose, *Significat destructionem substantiarum atque domorum ipsarum; & divites, & magnates pro nihilo reputabuntur, & exaltabuntur familiares atque servientes eorum Milites, Riches and Honor delph'd, and trampled on by Servants and Inferiors, and Superiors con-*  
tinned

## SAUNDERS, 1674.

temned by Rusticks, and of the most inferior condition  
*but this*, in the North-eastern parts from England.

### Of the Four Quarters of the Year, And first of the Spring,

**W**Hich begins this year the 10th of *March*, near 4 of the Clock in the morning, the *Sun* then entering the first Scruple of *Aries*, *Equalizing* day and night (except within the Polar Circles) all the World over: the *Air* then obtaining an equal Temperament, by reason of which, the *Pores* of the Earth are relaxed, and a generative vivifying fume evaporateth, which breathingly ascending by the chidified roots of Plants and Herbs, Produceth and Augmenteth their vegetable life.

The nature of this Quarter is generally *hot* and *moist*, which if it prove otherwise, it produceth sudden strange Diseases, and noxious distempers, for Generation consists in *Heat* and *Moisture*, therefore such persons as be Naturally *Melancholly* are best in health this Quarter, the *Sanguine* constitution the contrary, *Age* is strong and lively, *Childhood* and *Youth* inclinable to many Distempers: that distemper in Man is most dangerous which draws its original from putrified and corrupted blood, as *Synocha*, and *febris putrida*, that which proceeds from *Melancholly* is less dangerous as the *Quartaine*.

*Caution* by all People to beuiled, for now the *Pores* of the body begin to open, by the increasing heat, which by Frosty Evenings, and Cold Mornings, oft, and quickly, may prejudice your healths, for want of heedful keeping warme, many hurtful distempers, through cold, invade our Bodies.

The Diseases chiefly reigning this Quarter, are *Fluxes*, *Squinances*, *Coughes*, *Rheumes*, *Hoarsness*, *Madness*, *Frenzy*, *Falling Sicknes*s, and all Distempers proceeding from *Adulst* and *Black Choller*, *Leprosies*, *Pimples*, *Tetters*, *Ringwormes*, *Ulcerous Pusshes*, *Wheales* and  
*Blaines*.

## A Prognostication.

Blaines, paines in the Foynts, Collick, Faintings, Palpitation of the Heart and Plurisies, as also Acute, Peracute, and Perperacute Feavers, the Spring Diseases are most part short, and rather conclude in health than death.

In this position of Heaven, at the Suns ingress into Aries, onely Mars possesseth the Angle of the Ascendant, and is somewhat dignified and in reception with Saturn Lord of the Ascendant, and *h. tempore enim Caloris, minuit calorem, & tempore frigoris auget frigus* in hot weather he abates the Heat, and in cold increaseth the same, Mars in the Ascendant acts *e contrario*, abating *h.* malignancy as to the season. And moreover Mars *co Anno feliciter bella gerant, Spolia & lacra, multa reportent*, those People dignified by him shall happily wage War, and gain great Booties; but the most considerable in this Spring quarter are Jupiter and Venus, the first having, according to Origanus 34 essential Dignities, and Venus 13, as also the Moon 10. *aer autem salubrior efficitur, ab aura seu vento septentrionali quem Monet Jupiter ex quibus animalia & semina confortantur, & Epidemicæ infirmitates ac pestes minuantur.* A wholesome Air, a kind and healthful Spring for Man and Beast, and fruitful; Venus likewise in the second, gives peace, prosperity, health, and tranquility;

————— *Caput Draconis in prima Domu cum Marte in Aquario, detrimentum significat religiosorum atque fidei sectatorum & mortem Quorundam ex eis, & judicium, atque legis Doctorum*, some eminent Clergyman, (It may be the old Statholder at Rome) Doctor or Lawyer, suffer Death or Detriment near this time; and Cauda in the seventh house signifies, *quod non gaudebunt viri cum uxoribus suis, ut sunt consueti gaudere, erunt vixæ atque contentiones*: Its like not to be a kind time to Marry in, for Quarrels and Contentions more than ordinary, will be apt to grow betwixt the nearest Relations, upon Jealous Suspicions.

## Of Summer.

**T**His Quarter begins the 11th of June, at 7 a Clock in the forenoon, the Sun then entering the first Signe of *Cancer*, making to all (who live on this side the Equator) the longest day and shortest night in the year.

The Natural constitution of this Quarter, is Hot and Dry, agreeable to *Manhood*, and sympathizing with *Cholick*, and *Flavous Melancholly*, the *Flegmatick* are at this time best at ease, and in health, the *Cholericke* otherwise, Decrepit old Age is revived, and Youth debilitated, because they abound with blood and cholick, and are thereby much exposed to Feavors, especially the *Tertian*, for the distempers that arise from the excess of blood and cholick, are more dangerous, then those, that take their originall, from Blood and Flegme.

The Diseases most afflicting this Quarter will be *Agues*, Hot burning distempers, *Acute Feavors*, *Synochi* and *Tertians*, *Vomiting*s, *Alvi profluvia*, *Rheums*, and *Sore* running eyes, pains and distempers in the Eares, *Ulcers* in the Mouth and Nose, red and angry *Wheales*, *genitalium putredines*, but from infectious and strange Diseases, Good Lord deliver us.

In this Summer Quarter, the Sun entering *Cancer*, the preventional Full Moon, and the postventional New Moon considered, the Sun and *Jupiter* chiefly excel in dignities, the Moon and *Mars* indifferently fortified, but *Saturn* and *Venus* very weak, we will briefly consider each, and first as the Sun is principle lord of this Quarter, and in the 11th House of Heaven, *Florentem & Latum statum plebi sub Magistratu & dona regum pollicetur*. A very flourishing condition of Subjects, and much good will of their Princes to them, much friendship and love betwixt Friends, and great affection and joy between Princes and their People, a fruitful and joyfull season to the Husbandman, *Sublimates atque sublimitatem regum, & gloriam & honorem significat*, Great Glory

## A Prognostication.

ry and honors to some Prince or Princes in the Northern parts of the World.

*Jupiter* is very strong in this Quarter, and temperates the Air, producing wholesome breezing Winds, and plenty of Corn and Fruits, *Culturam agrorum fortunat, ex Quibus magnum proventum spondet*, promiseth the Husbandman a good increase, as also success and unanimity to Religious persons and Lawyers.

The Moon Angular in the 7th with *caput Draconis*, significat *lucrum ex parte mulierum & conjugii*, this hath signification of Marriages, that Men may get Wives and Money, and if there be any happiness in Marriage to be found, now as well as any time, by them that will be inquisitive that way, this also signifies *fortitudinem inimicorum*, strong and willful enemies, saith mine Author, which may be supposed he meanes Wives, or rich Wives, which oft times prove so. But we must not omit *Mars* who hath 10 dignities in this Quarter, and is in his own house angular upon the 10th, *significat ventos validos, & multas ac varias mutationes Aeris*, strong Winds and sudden changes in the temper of the Air and Weather; & in *partibus Orientalibus* in the Eastern, and North-east parts, *Bellum significat in eisdem partibus*, Warr in those parts, and that the victory shall incline to them who sympathize with *Mars*, and who are under his signification, and if this find not the Breaches made up in *Holland*, and those Countreys, it will further their ruine, *Nam significat tribulationem venturam Rusticis atque popularibus*, from several Positions in this Quarter, is promised good, in Health and Trade to the Honourable City of London.

## Of Autumn.

THIS Quarter begins, the Sun entring the *Æquator* in September 12th, 35 min, after 10 at night, the Sun then Crossing the Worlds Axis, with a right Angle, makes Equal Day and Night all the World over, betwixt the Polar Circles.

This

## S A U N D E R S, 1674.

This Season is by Nature Cold and Dry, and agreeth to Melancholy, resembling Age, the Sanguine constitution now is most lively, strong, and best in health; The melancholy most afflicted, best time for Youth and Childrens health, and the worst time of the year for Age.

Those Diseases (for the most part) that are taken this Quarter, continue long, and are hardly cured, because they usually arise from Surfeits, and Melancholy, as Erratick Feavors, Quarantines, the Spleen, Stringury Oppilation of the Mesentericks, Sciatics, Chiragra and Podagra, Squinances, difficulty of Breathing, Tiffick, Madnes through Cholera Adduct, and Melancholy, Convulsions, Cramps, Fits of the Mother, falling Sickness, and the like.

In this Autumn Quarter the Sun, Mars, and Jupiter are found weak, and are of small signification, onely Venus and Mercury are equal in power, the Moon is next fortified, and next Saturn, who hath 13 Dignities, Mercurius, bonum successum & finem in Negotiis Regi, A good end and happy success to His Majesty in all Affairs whatever, with Honor and Renown, Nunc, finis Coronat Opus, all other significations tend to this, much various and uncertain weather, oft high, and tearing Winds, the Air producing much cold winterly weather, and a sharp season; Some secret plots and Clandestine contrivances, by some Malignant sordid Spirits, discontented about Religious Tenets, which will end in their own sorrow and vexation.

### Of Winter.

**VV** Hich begins (the Sun entering the first scruple of Capricorne) this year the 11th of December, at 10 min. after 10 in the morning.

This Quarter is generally cold and moist, in the beginning the Sun passing Capricorne more cold then moist, in the midst the Sun in Aquary equally cold and moist, in the latter part thereof, the Sun in Piscis, more moist than cold.

## 'A Arognostication.

This season is Summers *Antagonist*, the predominant cold now binds, and shuts up the *Pores* of the *Earth*, that the Native heat, contained in the bowels thereof cannot evaporate, nor be emitted, which being thus restrained within the womb thereof, nourisheth with life the *Roots* of Herbs, Plants, Trees, and all Vegetables, acting the part of a pregnant Mother, preparing for an approaching Spring, though for the present she produce no increase, because heat and moisture languish, which are the Natural Causes of fructification; even so is it in the Body of Man, the *Pores* are contracted, by reason of the Ambient condensing cold, which causeth more intense heat to the stomach and inward parts.

Amongst the Humors, *Flegme* is most predominant, and of constitutions the cold and moist; The decrepit age and state of man, is most consonant to this Quarter, whence it is that old and phlegmatick people are now most distempered, and the *Cholerick* are in this season best in health, Age is most weak, and youth most vigorous and healthful.

As to *Diseases* those are most obstinate to cure whose original are from tough *phlegme*, as Quotidian *Agues*, and the like, the less dangerous will be such, as proceed from *Choler*, as the Tertian.

The distempers that are most likely to afflict us this Quarter, are *Coughs*, *Catarhs*, *Rheumes*, *Plurisies*, and *Inflammation* of the *Lungs*, *Distillations*, with *Hearsness*, paines in the *Breast*, *Sides*, *Headach*, *Vertigoes* and *Apoplexyes*, *Prickings* in the *Sides* and *Loyes*; the Winter Maladies are *Acronique* for the most part and durable.

In this Winter Quarter, *Saturn* is very powerful, *Mars* and *Mercury* are next in Dignities, which threaten much hard and sharp, with oft windy weather, about and after *Christmass*, and *Saturne* as here posited *gravitatem & miseriam*

*miseriam magnatum significat, qui fuerint in partibus Orientalibus:* The High and Mighty HOGEN MOGENS (who have Blasphemously so stiled themselves of many years) may find their Troubles Correspondent to their Titles, *Magnates pro nihilo reputabuntur*, Great ones shall lose Houses, Riches, Honour, and their Greatness buried in Oblivion, and their swelling Titles nothing set by.

Mars in this position afflicts Men with Fears, and Suspicious Jealousies one of another to the ruine of Friends and Societies, especially where Democracy is most prevalent.

Venus in the Ascendant in ♀ to ♃ signifies much good to Men and People, in whose Ascendant she is, as to all splendor, profit, plenty, health and pleasure.

But Jupiter in the Angle of the 10th *temperat Aërem in principio Hyemis*, this temperates the Air, and betters the weather in the beginning of Winter, and signifies the good Estate of some Kings and Princes, and mutual Love betwixt them and their Subjects, the continuance and increase of their Honour, Honesty and Grandeur, That England may have her share herein, I confidently hope, and heartily wish, *Quod faxit Deus*.

*Si Deus pro Nobis, Quis contra nos;  
Si non aliter.*

This day His Majesty created the Right Honourable the Earl of *Shaftsbury*, Lord High Chancellor of *England*.

T.

## To the Buyers Yearly of ALMANACKS.

**W**E're Ignorant, how soon, Vain, Mortal Men;  
We may Resolve to Elements agen:  
Certain there's naught, to Mortal Frames below;  
But Frightful Death, and Certain, that we know.  
Threescore and Ten (thus Holy David Sung)  
No more; but then, *Mine* Glais of life was run:  
Learn (from this Book, of *s.a.c.*) what's to be done;  
Alas, how fast they come, how quickly gone.  
For, see, the old Year, modestly withdrew,  
And, has in Publick, now brought forth a New.  
So, silently from year to year they climb,  
To the last moment of Recorded Time.  
And, now thy Almanack, thy Diall say,  
With this Divine Inscription, Watch and Pray;  
As once a Noble Roman, alwayes wou'd  
A Deaths-head at his Table serv'd-up shou'd;  
Wherein, his more then welcome Guests, might see;  
An Exact Emblem of Mortality.  
So may your Almanacks; and, in a word,  
When i'th' Front, you Read, i'th' Year of our Lord,  
Think, 'tis the Year, of Judgment that is come,  
And you, and all, must straight expect their Doom.  
Then Dying, thou (shalt hence) in peace, not strife,  
When Short-fetch't-Breath, Catches at Parting-life.
